Top Cut tires are OK (anything more are illegal)

***Underlined Classes are part of the NEW Motorsports Pulling Point Series. For more info view www.new-motorsports.com or call 715-582-3912.

Tractor Pull Rules for 2007
(Pound, Equity, Wausaukee and Lena)

Tractors may pull in a maximum of 2 classes, once per class. Unless deemed otherwise by judge.

Fenders are required. Wheelie bars and kill switches are strongly encouraged. If you do not have bars and a switch you will be held to a higher standard of control by the judges vs. ones with safety equipment.

Late Entries to classes after registration closes will be charged an extra \$ 5 per class if allowed to pull.

Weight and drawbar height (not to exceed 20 inches) will be checked at scales, plus verified before pull.

No 4-wheel drive, steel wheel or crawler type tractor. No duals, tire chains or cut tires (cannot cut the front or back, the top of the lug is OK). Max tire size in Antique are 15x38 or 14.9x38 for 5000 lbs and under. Greater than 5001 lbs. Cannot exceed 18x38. Farm Class max is 20.8x42 or factory issue size for that model.

No car motors are allowed to compete. They will be allowed to pull exhibition if it is deemed safe.

Due to recent accidents/incidents with tractors being stripped and altered for weight loss, we will monitor the size of tractor entering in a class. We are not changing the rules, but if a tractor is deemed unsafe or oversized for the class it will be sidelined or put into the appropriate class. An example is an 88 pulling 3500, not acceptable.

Weights cannot interfere with hook up. Weights must be securely fastened, for if a weight falls off while hooked to the eliminator you will be disqualified. Weights not 1 the diameter of the rear tire or deemed unsafe or unreasonable for a judge will have to be changed, modified or omitted.

front Weights cannot be mounted no further than 24 inches beyond the front casting of the tractor.

All minors must have written permission from their parent or guardian. Minors 14-16 must have a tractor safety course certificate to present at the time of registration. If no certificate an evaluation by the judges of the tractor and/or driver may allow a minor to compete.

turbo size should not exceed 2.75" for farm class and no deck plates.

One agricultural updraft carburetor per tractor and no alcohol fuels or injection allowed. (LP, Gas and Diesel only)

any driver leaving their seat, slipping clutches after 50ft., or going out of bounds will be disqualified.

Driving over 5 mph through the pits, unacceptable behavior or unruly crew member can cause disqualification.

Tractors may stop in the first 75 feet to change gears or add weights to the front. 1st puller does not have the option to re-pull.

One rule that may be mandatory in 2008 will be wheelie bars and kill switches for all non-pace classes. If you have other suggestions please let us know.

Judges have the right to add and delete classes. Add, delete modify or clarify rules. Judges decisions are final.

For questions or more information call 920-897-3508 before 9 pm or 715-923-6861 anytime and the day of the pull.
